## Team effort creates simulation lab benefitting students across disciplines

Published 11/24/2022 by Stephanie Conte

It takes a village to prepare career-ready graduates with the skills and experiences to be successful.

At Seneca, this includes cross-disciplinary experts coming together to provide students learning environments that replicate what they will encounter on the job.

A recent example is the Simulation Apartment Lab at King Campus, where Honours Bachelor of Behavioural Psychology (BBP) students participate in simulations that replicate interactions with real clients as part of the Adulthood and Aging course.
